Open to NYC · Hybrid / Onsite

## Skills

**Languages:** SQL (analytical & reporting), Python (data analysis), R, Java

**Data & Analytics:** Pandas, NumPy, Excel, Power BI, NLP

**Platforms & Tools:** Apptio, Dodeca, Essbase, Git

## Employment

### Wells Fargo

#### Finance Rotational Program Analyst | Commercial Banking

July 2025 - Present

*Transitioned into associate analyst ownership during rotation*

- Queried and consolidated financial data using SQL and Essbase, producing 100+ market-specific reports monthly for 40+ analysts and senior leaders.
- Delivered daily executive-level portfolio reports, leveraging SQL and BI tools to provide insights on loans, deposits, and regional performance.
- Led ad hoc analytical deep dives, identifying drivers of portfolio volatility and translating complex data into actionable insights for senior management.

### Wells Fargo

#### Finance Rotational Program Analyst | FP&A

July 2024 - July 2025

*Assumed full ownership of enterprise FP&A analytics after departure of senior analyst*

- Managed and validated 20,000+ consultant templates and reports daily, ensuring accuracy and completeness in Apptio financial databases.
- Executed biweekly SQL validations on 7 million+ tables, running automated jobs to ensure data integrity across enterprise FP&A datasets.
- Investigated and resolved data discrepancies using SQL and automated workflows, implementing durable fixes to preserve accuracy of cost recovery reporting.
- Supported enterprise reporting pipelines by running batch jobs and resolving data breaks, ensuring continuous availability of accurate FP&A datasets.

### Verizon

#### Data Analytics Intern

June 2023 - August 2023

- Analyzed survey data from 1,000+ business leaders using Python (Pandas, NumPy) to assess enterprise risk perception across operational divisions.
- Applied NLP, clustering, and K-means to unstructured survey responses, transforming free-form text into structured insights and risk themes.
- Built visualizations and heatmaps to surface short-term vs long-term risk patterns, directly informing audit leadership's risk prioritization strategy.
- Presented analytical findings to senior stakeholders, influencing how audit resources were allocated across business units.

### Capital One

#### Data Analytics Apprentice

June 2022 - August 2022

- Conducted data-driven analysis of historical data breaches using Python (Pandas, NumPy) and R, identifying trends in exposure, response, and regulatory risk.
- Analyzed large datasets using SQL and Pandas, generating insights and visualizations to support risk assessments.
- Evaluated privacy implications of customer data sharing with third parties, contributing to the development of compliant data governance protocols.
- Delivered analytical findings through a capstone presentation to business and risk leaders, translating complex data into clear recommendations.

## Education | University of Virginia

August 2020 - May 2024

- **Major:** Computer Science, B.A. (in-major GPA: 3.5)
- **Major:** Economics, B.A. (in-major GPA: 3.4)
